

Forever Goldendoodle

New Pet Supplies list:

We're so glad you chose to adopt with us! Getting a new pet can be so exciting, and also a little bit of work. We are here to help! Along with our go home packet we provide, here are some recommendations for supplies you may want to consider to help Puppy's transition as cozy and flawless as possible.

CRATES (Size, & Types)

1- Mini- 19x 16x24

1-Standard- 42x 42x27

Plastic sided travel crates.

Wire crate for indoors

Wire gate, and playpens (OPTIONAL)

BED/BLANKETS

WATER/ FOOD DISHES

Puppy food formula is best until they graduate to the next stage in life after 10-12 months

TOYS/ TREATS

Ropes are great for flossing and are a great chew option

We love squeaky tennis balls too

(Non-rawhide) chew bones are a good highly digestible option have a few kinds on-hand

Small bag soft treats(Zuke's) are a great treat for training and treating good behavior

COLLAR/ LEADS & HARNESES

Adjustable collars with a break-away safety feature are recommended

1- small 9-11"

Or 1- med. 10-16"

Adjustable Body harness with a clasp for attachment to lead Small-Medium

1- harness

Small-Medium lead 4ft-6ft length

BATHING/ BRUSHES

Upkeep of hygiene will ensure your puppy stays happy and healthy.

Two sided Soft bristle brushes

1 -brush

Calming/ natural shampoo

Daily vitamins (OPTIONAL)

RESOURCES

Chip Registration online is important for linking your ownership to the dog (Global pet)

Choose a local Veterinarian with the ability to accept new clients. It is key to the health and wellness of you and your new puppy.

Preparing your home:

Setting up a designated space for your puppies crates and playpens will be most helpful before they arrive into your home.

CRATES

Are best placed in an adjacent room, where they can retreat if needed to rest.

Limiting guests for the first day or so is best for their adjustment, puppies are people magnets and naturally extra excitement may be a little much in the beginning.

Barrier gates are a good option for confining to one area of the house while they are still learning

Playpens (OPTIONAL) and pups can have that area to rest or play in a room you spend most time in!

BED/BLANKETS

Always nice for comfort and sleeping needs. Flat crate beds are nice for inside the crate for sleeping needs.

This also allows puppies to have a place to rest after playtime and exertion. They will need rest as they grow.

WATER/ FOOD DISHES

Establish a low traffic area to install and make a permanent space for your puppy to eat in peace. Having a feeding schedule to start is great for potty training, and if possible leave water out at all times.

Following the feeding schedule amounts listed on the bag of food is a good guideline for how much to feed your puppy, as they grow and mature they will eventually graduate to an adult food.

Consult your veterinarian for best transition period for your puppy.

TOYS

Having chew toys and such available is a great way to entertain your puppy. Bones that are safe would be (non rawhide) and beef bones, NEVER feed puppies or any animal chicken bones. They pose high choking hazards.

COLLAR/ LEADS & HARNESSSES

- Collars, Identification Tags, and Registering your puppy's chip number are important first steps!!

Having your leash, and harness available at the door is always handy for quick potty breaks and walks. This will also help your dog associate the lead with going outside.
